DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

This three story, four bay attached structure is located in the center of the block. The construction is brick, a running bond with the front brick in a decorative style (etched) and painted yellow.

The roof is flat with rear chimney and simple wooden cornice above the third floor.

The main entrance is a double door center with a vestibule and a flat metal transom. The vestibule has a tile entrance and is fifteen feet deep. The first floor is a store front.

The second floor has a bay window, recessed and is in four panels, the entire width of the second floor with full wooden lintel.

The third floor windows are equally spaced, are six-over-one with brick sills. A significant point in this building would be the design in brick over the third floor windows. The design consists of two rectangles constructed of raised brick around the perimeter of the rectangle and large enough to equal the width of two windows. These two rectangles are placed symmetrically over the third floor windows.
